## PRODUCT BULLETIN

### ALUM BRITE 4000

#### Aluminum Cleaner

##### General Description

**ALUM BRITE 4000** is a blend of hydrofluoric and phosphoric acid, detergents and cleaners designed to clean aluminum, stainless steel and fiberglass. Formulated to be used up to 1:60 dilutions, **ALUM BRITE 4000** is economical and effective for use in 2 part truck washing systems, parts cleaning, and descaling of AC heat exchanger fins. This product will leave aluminum with a bright appearance. A unique detergent action is strong enough to remove carbon deposits. **ALUM BRITE 4000** does contain Hydrofluoric Acid, so all safety precautions should be followed for products containing Hydrofluoric Acid when used.

##### Application

Dilute **ALUM BRITE 4000** in ratios from 1:1 to 1:60 in water depending on surfaces and items to be cleaned. **ALUM BRITE 4000** can be applied with a brush or sprayer on wet surfaces. Apply from the bottom and work up allowing two to five minutes for penetration of the deposits. Rinse well with water while brushing in order to get a brighter surface. For fiberglass, use 1:10 ratio with water, spray or brush onto surface, brush off deposits and rinse.

##### Physical Properties

Color	Water-white
Odor	Acid
Water Solubility	100%
Density	9.15 ppg
Freeze Point	28° F

##### Availability

**ALUM BRITE 4000** is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

##### Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply. This document does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this product to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.
