PRODUCT BULLETIN

ALUM BRITE 205

Aluminum Cleaner

General Description

ALUM BRITE 205 is a blend of moderately aggressive acids, detergents and cleaners designed to clean aluminum, stainless steel and fiberglass. **ALUM BRITE 205**'s unique detergent action is strong enough to remove surface carbon deposits and brake dust residue. **ALUM BRITE 205** is very effective for cleaning aluminum and when used as directed, will not etch aluminum surfaces helping to keep polished aluminum bright. **ALUM BRITE 205** has proven effective in cleaning aluminum parts such as carburetor bodies, engine heads, and decorative aluminum fixtures.

Application

Use **ALUM BRITE 205** as provided, or dilute in ratios of 1 : 3 to 1 : 7 in water depending on surfaces to be cleaned. **ALUM BRITE 205** can be applied with a brush or sprayer on wet surfaces. Ultimate dilution is predicated on item to be cleaned. Apply from the bottom and work up allowing two to five minutes for penetration of the deposits. Rinse well with water while brushing in order to get a brighter surface. For fiberglass, use the dilution ratio in water that is most effective. Spray or brush onto surface, brush off deposits and rinse.

Physical Properties

Color	Water-white
Odor	Acid
Water Solubility	100%
Density	9.75 lbs./gallon
Freeze Point	28° F

Availability

ALUM BRITE 205 is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply. This document does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this product to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.
