PRODUCT BULLETIN

FUEL SPEC D

All in One Diesel Fuel Additive

General Description

FUEL SPEC D is formulated to improve fuel efficiency of diesel powered engines (direct or indirect injected) that will, based upon the operators preference, either reduce fuel consumption or increase power output from their existing engine fleet. **FUEL SPEC D** is formulated with a proprietary lubricant technology will reduce wear and thus extends engine component life resulting in an overall reduction in maintenance expenses. **FUEL SPEC D** will provide a more reliable and smoother running engine fleet. **FUEL SPEC D** reduces exhaust emissions, allowing owners and operators of these engines operators to positively impact the environment and address tightening emissions regulations. **FUEL SPEC D** provides its multifunctional benefits without harmful side effects and without contribution to any emissions or combustion products considered harmful to the environment.

Using **FUEL SPEC D** will lower fuel requirements, reduce exhaust gas temperatures, reduce carbon deposits, lower coefficient of friction, and reduce emissions. The operator can expect 3 - 10% improvement in fuel efficiency. Low speed (stop and go, school buses, waste disposal trucks) engines have seen mpg go from 3 to 9 mpg in one tankful.

Use

FUEL SPEC D should be added to the tank before filling to assure adequate mixing prior to use. One gallon of **FUEL SPEC D** will treat 1200 – 1400 gallons of diesel (approximately one ounce per 10 gallons of fuel).

Physical Properties

Color	Amber Liquid
Odor	Mild Solvent
Specific Gravity	7.5 - 8.0
Flash Point	~ 130° F
Solubility	Soluble in Hydrocarbons

Availability

FUEL SPEC D is available in UN approved One gallon containers, 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
