PRODUCT BULLETIN

ET-700

Biodegradable Cleaner Heat Transfer Systems

General Description

ET-700 biodegradable cleaner for heat transfer systems is concentrated neutral pH solution specially formulated to remove rust, mineral scale and corrosion by products from radiators, cooling systems and other heat transfer systems.

ET-700 is safe to use in cleaning multi-metal systems containing carbon steel, copper and aluminum.

Application

ET-700 is formulated to be diluted from 1 : 5 for heavy contamination, 1 : 10 for medium contamination, and 1 : 20 for light duty applications. In all cases, best results are obtained when heat of 150° F to 180° F is applied. For precise recommendations contact **JMN Specialties, Inc.** service personnel. (See attached guidelines.)

Physical Properties

Color	Green
Appearance	Clear
Odor	Mild Surfactant
Specific Gravity	1.19
pH	5.8
Freeze Point	17° F

Availability

ET-700 is available in un approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
