## PRODUCT BULLETIN

### FUEL PREP-1336

#### Diesel Fuel Treatment

##### General Description

**FP-1336** is a preventative maintenance diesel fuel treatment compound designed to help retard bacterial and fungal growth in fuel tanks. The unique formula will prevent fuel degradation, help keep injectors clean, control sludge formation, reduce external exhaust smoke and help prevent plugging of fuel filters and lines.

##### Application

One gallon of **FP-1336** treats 12,500 gallons to 25,000 gallons of fuel. Always add **FP-1336** to fuel tank before filling with diesel to insure proper mixing.

##### Physical Properties

Color	Amber Liquid
Odor	Solvent
Specific Gravity	8.0
Flash Point	> 100BF
Solubility	Soluble in Hydrocarbons; Dispersible in water

##### Availability

**FP-1336** is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

##### Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
