PRODUCT BULLETIN

MULSPEC 1500

Specialized Solvent Cleaner

General Description

MULSPEC 1500 is a combination of aromatic solvents, surfactants, and natural organic oils specially blended to be used in degreasing and chemical cleaning processes. **MULSPEC 1500** can be used as an organic dispersant, heavy oil, grease, and condensate solvating agent. **MULSPEC 1500** contains asphaltine inhibitors to help prevent the redeposit of asphalt contamination to cleaned surfaces. **MULSPEC 1500** is effective wherever tenacious oils, tars, or greases pose a problem for conventionally formulated cleaning compounds. **MULSPEC 1500** can be formulated with aliphatic solvents (diesel, kerosene, etc.) to increase those solvents ability to dissolve paraffin's and hardened oily residues. When diluted with water, **MULSPEC 1500** will form stable emulsions to allow for economical use and fast dispersal of oily contamination.

Application

MULSPEC 1500 is excellent as a pipe thread cleaner, valve cleaner, for drip pans, for use as a degreaser in closed circulation systems or as a bulk degreaser in cleaning process vessels. Extreme care should be used when handling this material to avoid contact with flame or welding arcs. Proper engineering controls must be used when using this product.

Physical Properties

Color	Clear to Light Amber
Odor	Solvent
Specific Gravity	0.80 - 0.82
Flash Point	> 150° F
Boiling Point	> 300° F

Availability

MULSPEC 1500 is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
