

## PRODUCT BULLETIN

# QUICK SPLIT 12

## Low-Foaming Water-Based Oil Splitting Degreaser

### General Description

**QUICK SPLIT 12** is a blend of water based surfactants, water based solvents, and alkaline detergents, specifically formulated to clean oily deposits from hard surfaces. **QUICK SPLIT 12** is blended specifically for cleaning applications where the waste stream must pass through passive or active oil water separators. **QUICK SPLIT 12** will temporarily trap the oily waste in the water during the cleaning process and will quickly split, thus allowing for complete separation of the oily waste from the water solution in the downstream processing equipment.

At normal surfactant use dilutions, **QUICK SPLIT 12** is low-foaming. It is the ideal product for cleaning systems that require low foaming detergents. **QUICK SPLIT 12** will add wetting and detergency. It is an oil splitting detergent (it will not tend to emulsify soils).

For cleaning applications requiring some foam and a tolerance for a slower splitting speed, **QUICK SPLIT** is a suggested product.

### Application

**QUICK SPLIT 12** can be applied by almost any means including mops, rags or spray equipment. Allow solutions to penetrate deposits before rinsing. Do not allow cleaning solutions to dry on surfaces before hosing.

### Dilutions

**QUICK SPLIT 12** is a concentrated cleaner and should be diluted for best results:

Heavy	1 part <b>QUICK SPLIT 12</b>	2 parts water
Medium	1 part <b>QUICK SPLIT 12</b>	5 parts water
Light	4 oz. <b>QUICK SPLIT 12</b>	1 gallon water

### Availability

**QUICK SPLIT 12** is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

### Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
