PRODUCT BULLETIN

RP-309

Rust Preventative Storage Compound

General Description

RP-309 is an outstanding water displacing, non-staining rust preventative which will rapidly separate water displaced from metal surfaces after machining operations or after alkali cleaning. Ultra thin, highly protective films are applied to unpainted or painted surfaces with **RP-309**. These ultra thin, highly protective films are effective in the protection of ferrous and non-ferrous metals from atmospheric corrosion even under conditions of high humidity, both fresh or salt mists. Materials protected with **RP-309** are protected indefinitely for inside storage even under extreme conditions.

Application

RP-309 can be applied by dipping the parts to be protected in a vat or spraying the parts to be protected with air sprayers, pump type sprayers, or by pouring the product over the parts. Removal of protective films is accomplished by using a steam cleaner or washing the parts in mineral spirits.

Physical Properties

Appearance	Amber Liquid
Odor	Solvent Odor
Specific Gravity	0.83 - 0.85
Flash Point	> 120B F
Melting Point	95B F
Saponification Numbers (ASTM-D94)	85-105

Various blends of **RP-309** meet or exceed the following MIL-SPECS: MIL-C-16173 GRADE 3 & GRADE 5; MIL-C-22235; MIL-C-81309, TYPE II & III. Request the specific MIL-SPEC required before ordering.

Availability

RP-309 is available in UN approved 5 gallon pails and 55 gallon drums.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
