PRODUCT BULLETIN

SPEC HIB 610

Asphaltene / Paraffin Dispersant

General Description

SPEC HIB 610 is a concentrated blend of synthetic solvents, penetrants, and dispersants that work together synergistically for the prevention and dissolution of asphaltene and paraffin deposits.

SPEC HIB 610 is used in a wide variety of applications where asphaltene / paraffin deposits cause plugging, reduced productivity, and other production related problems. The multi-functional properties of this product provide superior deposit and sludge control compared to standard treatment programs using solvents alone.

Application

SPEC HIB 610 is used for a wide range of applications including Production Enhancement, Stimulation, Workover Fluids, Slop Oils, Tank Bottoms and Pipeline treating.

Physical Properties

Appearance	Amber Liquid
Specific Gravity	0.87 - .089
Flash Point	> 115°F
Solubility	Oil Soluble / Water Dispersible

Availability

SPEC HIB 610 is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
