

1 – PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME:	CITRA SPEC 850
CHEMICAL NAME/	
CLASS/SYNONYMS:	Aluminum Brightner, Acid Cleaner
PRODUCT NUMBER:	CITRA SPEC 850
UN/NA NUMBER:	1760
CHEMICAL FAMILY:	Compounds, Cleaning Liquid
CAS NUMBER:	Not applicable for mixtures.
FORMULA:	Mixture
COMPANY:	JMN Specialties, Inc.
COMPANY:	JMN Specialties, Inc. 1100 Victory Drive – Westwego, Louisiana USA 70094
COMPANY:	• •
COMPANY:	1100 Victory Drive – Westwego, Louisiana USA 70094
	1100 Victory Drive – Westwego, Louisiana USA 70094 Phone (504) 341-3749, Fax (504) 341-5868
	1100 Victory Drive – Westwego, Louisiana USA 70094 Phone (504) 341-3749, Fax (504) 341-5868 <u>www.jmnspecialties.com</u>
	1100 Victory Drive – Westwego, Louisiana USA 70094 Phone (504) 341-3749, Fax (504) 341-5868 <u>www.jmnspecialties.com</u> CALL CHEMTEL: Toll Free US & Canada: (800) 255-3924, Outside USA +01-813-248-0585.

2 – HAZARDS IDENTIFICATION

GHS HAZARD CLASSIFICATION:

Physical Hazards
Flammable Liquids:No Hazard Statement established for this Product Corrosive Liquids:May be corrosive to metals
Health Hazards
Acute Toxicity (Oral):Category 3 - Toxic if swallowed, in contact with skin, inhaled Skin Corrosion/Irritation:Catagory 2 - Causes skin irritation
Eye Damage/Irritation:Catagory 1 - Causes severe eye damage
Aspiration Hazard:Catagory 1 - May be fatal if swallowed and enters airways
Carcinogen:No Hazard Statement established for this Product
See Section 11 for additional Toxicological information

EMERGENCY OVERVIEW:

Pictograms:

Signal Word (GHS-US):DANGER!

Hazard Statements:

Physical Hazards (GHS-US):

H290: May be corrosive to metals

Health Hazards (GHS-US):

H301: Toxic if swallowed. H304: May be fatal if swallowed and enters airways. H311: Toxic in contact with skin. H314: Causes severe skin burns and eye damage. H318: Causes serious eye damage. H331: Toxic if inhaled.

Environmental Hazards (GHS-US):

H402: Harmful to aquatic life

Precautionary Statements (GHS-US):

P101+102+103: If medical advice is needed, have product container or label at hand. Keep out of the reach of children. Read label before use.

P202+233+270+280+281: Do not handle until all safety precautions have been read and understood. Keep container tightly closed. Do not eat, drink or smoke when using this product. Wear protective gloves/protective clothing/eye protection/face protection. Use personal protective equipment as required. P264: Wash thoroughly after handling.

P233+P403+P405: Keep container tightly closed. Store in a well ventilated place. Store locked up.

Response Statements (GHS-US):

P301+P312+P330+P331: IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. Rinse mouth. Do NOT induce vomiting. P305+351+338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do - continue rinsing. P310: Immediately call a POISON CENTER or doctor/physician. P337+313: If eye irritation persists get medical advice/attention. P304+340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. P314: Get medical advice/attention if you feel unwell. P303+361+353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. P332+P313: IF SKIN irritation occurs get medical advice/attention.

P501: Dispose of contents/container: Treatment, storage, transportation and disposal must be in accordance with Federal, State/Provincial and Local Regulations, and product characteristics at time of disposal.

TOTAL VOC's:.....< 2%

3 – COMPOSITION / INFORMATION ON INGREDIENTS		
HAZARDOUS INGREDIENT	PERCENT*	CAS NUMBER
Citric Acid	5 - 10	7732-18-5
Ammonium Bifluoride	8 - 12	77-92-9
2-butoxyethanol	1 - 3	111-76-2
Glycols, polyethylene, mono[(1,1,3,3- tetramethylbutyl)phenyl] ether	1 - 3	9036-19-5

*Any concentration shown as a range is to protect confidentiality or is due to batch variation.

4 – FIRST-AID MEASURES

BREATHING (INHALATION):	Remove from exposure area to fresh air immediately. If
	breathing has stopped, perform artificial resuscitation. Keep
	person warm and at rest. Treat symptomatically and
	supportively. Seek medical attention immediately. Qualified
	medical personnel should consider administering oxygen.
SWALLOWING (INGESTION):	Give large amounts of fresh water or milk immediately. Do not
	give anything by mouth if person is unconscious or otherwise
	unable to swallow. If vomiting occurs, keep head below hips to
	prevent aspiration. Treat symptomatically and supportively.
	Seek medical attention immediately.
EYES:	If liquid solutions containing acids get into the eyes, flush eyes
	immediately with a directed stream of water for at least 30
	minutes while forcibly holding eyelids apart to ensure complete
	irrigation of all eye and lid tissue. GET MEDICAL ATTENTION
	IMMEDIATELY. Contact lenses should not be worn when
	working with this chemical.
SKIN (DERMAL):	Remove contaminated clothing and wash affected skin with
	soap and water. If persistent irritation occurs, obtain medical
	attention. When using high pressure equipment, injection of
	product under the skin can occur. If high pressure injuries occur,
	the casualty should be sent immediately to a hospital. Do not
	wait for symptoms to develop.
NOTE TO PHYSICIAN:	Acid is reported to cause pulmonary function impairment.
	Periodic surveillance is indicated. This acid mixture may cause
	acute lung damage. Surveillance of the lungs is indicated.
	Ingestion may cause gastroesophageal perforation. Perforation
	may occur within 72 hours, but along with abscess formation,
	can occur weeks later. Long term complications may include
	esophageal, gastric or pyloric strictures or stenosis. All
	treatments should be based on observed signs and symptoms
	of distress in the patient. Consideration should be given to the
	possibility that overexposure to materials other than this
	product may have occurred.

5 – FIRE-FIGHTING MEASURES

GENERAL FIRE HAZARDS:	Wear other appropriate protective equipment as conditions warrant (see Section 8). Isolate damage area, keep unauthorized personnel out. Stop spill/release if it can be done with minimal risk. Move undamaged containers from danger area if it can be done with minimal risk. Fires involving small amounts of combustibles may be smothered with suitable dry chemicals. Use water on combustibles burning but avoid using water directly on acid as it results in evolution of heat and causes splattering.
AUTOIGNITION TEMP:	. No Data Available
EXTINGUISHING MEDIA:	Fires involving small amount of combustibles may be smothered with suitable dry chemical, soda ash, lime, sand or CO2. Use water on combustibles burning in vicinity of this material but use care as water applied directly to this acid may result in evolution of heat and this may cause splattering.
SPECIAL FIRE FIGHTING	
PROCEDURES:	Spilled product on ground may be slippery. Accordingly, safety precautions should be strictly observed when handling or cleaning it when spilled as the result of a fire.
UNUSUAL FIRE AND	
EXPLOSION HAZARDS:	Containers may explode from internal pressure if confined to fire. Cool with water spray.

6 – ACCIDENTAL RELEASE MEASURES

SPILL PROCEDURES:	Wear appropriate personal protective equipment before approaching spill site. For small spills, dilute with water to sewer if allowed by local and state regulations. If unable to wash product with water, absorb with inert material (sand or other approved material) and dispose of in accordance with applicable regulations.
WASTE DISPOSAL:	Treatment, storage, transportation and disposal must be in accordance with Federal, State/Provincial and Local Regulations. Regulations may vary in different locations. Characterization and compliance with applicable laws are the responsibility solely of the generator. Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

RCRA STATUS:.....If discarded in its purchased form, this product is considered a RCRA hazardous waste. It is the responsibility of the product user to determine at the time of disposal, whether a material containing the product should be classified as a hazardous waste. (40CFR261.20-24).

7 – HANDLING and STORAGE

STORAGE:	Keep in a tightly closed container, stored in a cool, dry, ventilated area below 44°C (110°F). Protect against physical damage. Isolate from incompatible substances. Containers of this material may be hazardous when empty since they retain product residues (vapors, liquid); observe all warnings and precautions listed for the product. Drum must not be washed out or used for other purposes.
HANDLING:	Avoid contact with eyes, skin and clothing. Do not inhale vapors and fumes. Wash thoroughly after handling. Use only with adequate ventilation. Do not take internally. For industrial use only.

8 – EXPOSURE CONTROLS / PERSONAL PROTECTION

OCCUPATIONAL EXPOSURE LIMITS

HAZARDOUS INGREDIENT

Citric Acid Ammonium Bifluoride 2-butoxyethanol Glycols, polyethylene, mono[(1,1,3,3tetramethylbutyl)phenyl] ether PEL None Established 2.5 mg/m³ 50 ppm None Established

TLV-TWA

None Established 2.5 mg/m³ 50 ppm None Established

EXPOSURE CONTROLS:	. Good general ventilation (typically 10 air changes per hour)
	should be used. Ventilation rates should be matched to
	conditions. If applicable, use process enclosures, local exhaust
	ventilation, or other engineering controls to maintain airborne
	levels below recommended exposure limits. If exposure limits
	have not been established, maintain airborne levels to an
	acceptable level. Please refer to the ACGIH document,
	Industrial Ventilation, A Manual of Recommended Practices,
	most recent edition, for details.
RESPIRATORY PROTECTION:	
	below recommended exposure limits (where applicable) or to
	an acceptable level (in countries where exposure limits have
	not been established), an approved respirator must be worn. In
	the United States of America, if respirators are used, a program
	should be instituted to assure compliance with OSHA Standard
	63 FR 1152, January 8, 1998. Respirator type: Air-purifying
	respirator with an appropriate, government approved (where
	applicable), air-purifying filter, cartridge or canister. Contact
	health and safety professional or manufacturer for specific
	information. Self-Contained Breathing Apparatus may be
	required for use in confined or enclosed spaces.
PROTECTIVE CLOTHING:	Eye/face protection: Wear chemical goggles; face shield (if
	splashing is possible). Skin protection: Chemical resistant,
	impermeable gloves. Gloves should be tested to determine
	suitability for prolonged contact. Use of impervious apron or
	chemical suit and chemical resistant boots are recommended.
ADDITONAL MEASURES:	Avoid contact with the skin and avoid breathing vapors. Do not
	eat, drink, or smoke in work area. Wash hands before eating,
	drinking, or using restroom. Do NOT place food, coffee or other
	drinks in the area where dusting or splashing of solutions is
	possible. Handle in accordance with good industrial hygiene
	and safety practice. Wash thoroughly with soap and water after
	handling and before eating, drinking, or using tobacco. Safety
	shower and eye wash should be available close to work areas.
	shower and eye wash should be available close to work all cas.

9 – PHYSICAL / CHEMICAL PROPERITES

рН:	<1
SOLUBILITY IN WATER:	100%
VOLATILITY	
INCLUDING WATER:	9.12 pounds per gallon
MOLECULAR WEIGHT:	No data available (G/MOLE)
EVAPORATION RATE:	Similar to water
PHYSICAL STATE:	Liquid
COLOR:	Clear to light amber
ODOR:	Sharp Acidic

10 – STABILITY and REACTIVITY

STABILITY:	Stable
HAZARDOUS DECOMP.:	Will not occur
INCOMPATIBILITY:	Contact of acid with organic materials (such as chlorates,
	carbides, fulminates, and picrates), alkaline materials and water may cause fires and explosions. Contact of acid with metals may form toxic sulfur dioxide fumes and flammable hydrogen gas. Contact with hypochlorites (e.g., chlorine bleach), sulfides, or cyanides will produce toxic gases.
HAZARDOUS REACTIONS:	This mixture may react with many organic and inorganic
	chemicals.

11 – TOXICOLOGICAL INFORMATION

THRESHOLD LIMIT VALUE:	1 mg/m ³
OSHA PEL:	1 mg/m ³
LISTED CARCINOGEN:	This product IS NOT listed in the National Toxicology Program
	(NTP) Report on Carcinogens (latest edition) or has been found
	to be a potential carcinogen in the International Agency for
	Research on Cancer (IARC) Monographs (latest editions) or
	found to be a potential carcinogen by OSHA.
MEDICAL CONDITION	
AGGRAVATED:	.Overexposure to inorganic acid mist may cause lung damage
	and aggravate pulmonary conditions. Contact of acids with skin may aggravate diseases such as eczema and contact dermatitis.

INFORMATION ON ACUTE TOXICOLOGICAL EFFECTS

ORAL

Product:Corrosive. May cause severe irritation and/or serious burns of the mouth esophagus or stomach. May be fatal if swallowed.

DERMAL

Product:Corrosive. Splashes on the skin may cause mild to severe skin irritation or possible skin burns. Extended contact with concentrated material can be severely irritating to the skin and may result in redness, swelling, burns and severe skin damage. **INHALATION**

Product:Corrosive. May be harmful or fatal if inhaled. May cause severe irritation and burns of the nose, throat and respiratory tract.

REPEATED DOSE TOXICITY

SKIN CORROSION / IRRITATION

Product:This product in concentrate can cause mild to severe irritation of skin, including burns. The product in dilute form acts as a mild irritant due to acid properties. **SERIOUS EYE DAMAGE / IRRITATION**

Product:Corrosive. Direct contact with the liquid or exposure to vapors or mists may cause stinging, tearing, redness, swelling, corneal damage and irreversible eye damage. Splashes in the eyes will cause severe burns. Contact lenses should not be worn when working with this chemical.

RESPIRATORY OR SKIN SENSITIZATION

Product:Populations that appear to be at increased risk from the effects of fluoride are individuals that suffer from diabetes insipidus or some forms of renal impairment.

MUTAGENCITY

IN VITRO Product: IN VIVO	No Data Available
Product:	No Data Available
Specified Substance(s)	Information as provided by manufacturer
Ammonium Bifluoride	No Data Available

CARCINOGENICITY

Product:IARC 3: Not Classifiable as to Carcinogenicity in Humans. ACGIH A4 - Not Classifiable as a Human Carcinogen.

REPODUCTIVE TOXICITY

Product:Based on the available test, not expected to cause adverse effects on reproduction.

SPECIFIC TARGET ORGAN TOXICITY – SINGLE EXPOSURE

SPECIFIC TARGET ORGAN TOXICITY – REPEATED EXPOSURE

Product:The effects of long-term, low-level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the avoidance of all effects from repetitive acute exposure. This product may aggravate existing eye, skin, and respiratory conditions.

ASPIRATION HAZARD

Product:Droplets of the product aspirated into the lungs through ingestion or vomiting may cause chemical pneumonia.

OTHER ADVERSE EFFECTS

Product:No data available

12 – ECOLOGICAL INFORMATION

ACUTE TOXICITY

FISH

Product:Fishes, Salmo gairdneri, LC50, 96 h, 51 mg/l (Fluorides).

AQUATIC INVERTEBRATES

Product:Crustaceans, Daphnia magna, EC50, 48 h, 97 mg/l (Fluorides).

CHRONIC TOXICITY

FISH

Product:Fishes, Salmo gairdneri, LC50, 21 Days, 2.7 - 4.7 mg/l (Fluorides), Crustaceans, Daphnia magna, NOEC, 21 Days, 3.7 mg/l (Fluorides), Algae, Scenedesmus sp., EC50, 96 h, 43 mg/l (Fluorides).

AQUATIC INVERTEBRATES

organisms.

TOXICITY TO AQUATIC PLANTS

Product:Harmful to aquatic organisms.

PERSISTENCE AND DEGRADABILITY

BIODEGRADATION

Product:This product contains organic and non-organic ingredients. Biodegradability for organic ingredients under aerobic static laboratory conditions is high (BOD20 or BOD28 / THOD greater than 80%).

BIOLOGICAL OXYGEN DEMAND

Product:The methods for determining the biological degradability are not applicable to predominately inorganic substances.

CHEMICAL OXYGEN DEMAND

Product:No data available

BOD / COD RATIO

Product:No data available

BIOACCUMULATIVE POTENTIAL

Product:The acids in this product all dissociate readily in water to fluoride ions that are naturally present in water/sediment and no potential for bioaccumulation is predicted. Bioaccumulative potential: log Pow Result: not applicable - (Fluorides). MOBILITY IN SOIL

Product:Acid / Water solutions are soluble in water and have high mobility in soil. During transport through the soil, acid solutions will dissolve some of the soil material; in particular, the carbonate based materials. The acid will be neutralized to some degree with adsorption of the proton also occurring on clay materials. However, significant amounts of acid are expected to remain for transport down towards the ground water table. Upon reaching the ground water table, the acid will continue to move, now in the direction of the ground water flow. Lime addition may be required to rectify low pH resulting from acid solution spillages.

RESULTS OF PBT AND mPvB ASSESSMENT

Product:Not fulfilling PBT (persistent/bioaccumulative/toxic) criteria. Not fulfilling vPvB (very persistent, very bioaccumulative) criteria.

OTHER ADVERSE EFFECTS

Product:No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential or global warming potential) are expected from this product.

13 – DISPOSAL CONSIDERATIONS

WASTE DISPOSAL:	Treatment, storage, transportation and disposal must be in accordance with Federal, State/Provincial and Local Regulations. Regulations may vary in different locations. Characterization and compliance with applicable laws are the responsibility solely of the generator. Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local
RCRA STATUS:	requirements. If discarded in its purchased form, this product is considered a RCRA hazardous waste. It is the responsibility of the product user to determine at the time of disposal, whether a material containing the product should be classified as a hazardous waste. (40CFR261.20-24).

14 – TRANSPORTATION INFORMATION

Important Note: Shipping descriptions may vary based on mode of transport, quantities, package size, and/or origin and destination. Consult your company's Hazardous Materials/Dangerous Goods expert for information specific to your situation.

UN/NA NUMBER:	1760
PROPER SHIPPING NAME:	. Corrosive Liquid, n.o.s., (CITRIC ACID and AMMONIUM
	BIFLUORIDE)
HAZARD CLASS:	.8
PACKAGING GROUP :	.11
LETTER:	C (Corrosive substances)
ENVIRONMENTAL HAZARD:	.Because of modern treatment methods or method of use of
	this product, only an insignificant amount of the ingredients
	reaches the environment. That amount is at such levels as to
	typically not cause any adverse effects.
REPORTABLE QUANTITY:	665 pounds (302 kilograms) based on Ammonium Bifluoride in
	mixture.

15 - REGULATIONS

This Safety Data Sheet conforms to ANSI Z400.5, and to the format requirements and the International Chemical Safety Cards of the Global Harmonizing System. This SDS complies with 29 CFR 1910.1200 (HAZARD COMMUNICATION STANDARD). **IMPORTANT:** Read this SDS before handling & disposing of this product. Pass this information on to employees, customers, & users of this product.

EPA SRA Title III Chemical Listings:

TSCA STATUS:	This product is listed on the TSCA inventory. If this product is a blend, all ingredients in the product are listed on the TSCA Inventory List. Any impurities present in this product are exempt from listing.
SECTION 302:	.665 pounds (302 kilograms) based on Ammonium Bifluoride (CAS # 1341-49-7) in mixture. Threshold Planning Quantity (TPQ)
SECTION 304:	.665 pounds (302 kilograms) based on Ammonium Bifluoride
	(CAS # 1341-49-7) in mixture. (RQ)
SECTION 312:	.Yes
SARA SECTION 313:	This material contains Ammonium Bifluoride (CAS# 1341-49-7), which is subject to the reporting requirements of Section 313 of SARA Title III and 40 CFR Part 373.
ACUTE:	.Yes
CHRONIC:	.Yes
FIRE:	.No
PRESSURE:	.No
REACTIVE:	.No
CLEAN WATER ACT:	.Yes
