4 – FIRST-AID MEASURES

BREATHING (INHALATION):	Remove from exposure area to fresh air immediately. If breathing has stopped, perform artificial resuscitation. Keep person warm and at rest. Treat symptomatically and supportively. Seek medical attention immediately. Qualified medical personnel should consider administering oxygen.
SWALLOWING (INGESTION):	. Give large amounts of fresh water or milk immediately. Do not give anything by mouth if person is unconscious or otherwise
	unable to swallow. If vomiting occurs, keep head below hips to prevent aspiration. Treat symptomatically and supportively. Seek medical attention immediately.
EYES:	Flush eye with copious quantities of water. If persistent
	irritation occurs, obtain medical attention.
SKIN (DERMAL):	Remove contaminated clothing and wash affected skin with
	soap and water. If persistent irritation occurs, obtain medical attention. When using high pressure equipment, injection of product under the skin can occur. If high pressure injuries occur, the casualty should be sent immediately to a hospital. Do not wait for symptoms to develop.
NOTE TO PHYSICIAN:	.All treatments should be based on observed signs and
	symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred. Material, if aspirated into the lungs, may cause chemical pneumonitis. Skin contact may aggravate an existing dermatitis. Treat appropriately.

5 – FIRE-FIGHTING MEASURES

GENERAL FIRE HAZARDS: AUTOIGNITION TEMP: EXTINGUISHING MEDIA:	959°F (515°C) ASTM E659
SPECIAL FIRE FIGHTING	Spilled product on ground may be slippery.
PROCEDURES:	Containers may explode from internal pressure if confined to
UNUSUAL FIRE AND	fire. Cool with water spray. Vapor accumulation could flash or
EXPLOSION HAZARDS:	explode if in contact with an open flame.

6 – ACCIDENTAL RELEASE MEASURES

SPILL PROCEDURES:	Wear appropriate personal protective equipment before approaching spill site. For small spills, dilute with water to sewer if allowed by local and state regulations. If unable to wash product with water, absorb with inert material (sand or other approved material) and dispose of in accordance with applicable regulations.
WASTE DISPOSAL:	Treatment, storage, transportation and disposal must be in accordance with Federal, State/Provincial and Local Regulations. Regulations may vary in different locations. Characterization and compliance with applicable laws are the responsibility solely of the generator. Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.
RCRA STATUS:	If discarded in its purchased form, this product is considered a RCRA hazardous waste. It is the responsibility of the product user to determine at the time of disposal, whether a material containing the product should be classified as a hazardous waste. (40CFR261.20-24).

7 – HANDLING and STORAGE

STORAGE:	. Keep in a tightly closed container, stored in a cool, dry,
	ventilated area below 44°C (110°F). Protect against physical
	damage. Isolate from incompatible substances. Containers of
	this material may be hazardous when empty since they retain
	product residues (vapors, liquid); observe all warnings and
	precautions listed for the product. Drum must not be washed
	out or used for other purposes.
HANDLING:	Avoid contact with eyes, skin and clothing. Do not inhale vapors
	and fumes. Wash thoroughly after handling. Use only with
	adequate ventilation. Do not take internally. For industrial use
	only.

8 – EXPOSURE CONTROLS / PERSONAL PROTECTION

OCCUPATIONAL EXPOSURE LIMITS

HAZARDOUS INGREDIENT Methyl ethyl ketone (MEK) **PEL** 200 ppm

TLV-TWA 200 ppm

EXPOSURE CONTROLS:	Good general ventilation (typically 10 air changes per hour)
	should be used. Ventilation rates should be matched to
	conditions. If applicable, use process enclosures, local exhaust
	ventilation, or other engineering controls to maintain airborne
	levels below recommended exposure limits. If exposure limits
	have not been established, maintain airborne levels to an
	acceptable level. Please refer to the ACGIH document,
	Industrial Ventilation, A Manual of Recommended Practices,
	most recent edition, for details.
RESPIRATORY PROTECTION:	If engineering controls do not maintain airborne concentrations
	below recommended exposure limits (where applicable) or to
	an acceptable level (in countries where exposure limits have
	not been established), an approved respirator must be worn. In
	the United States of America, if respirators are used, a program
	should be instituted to assure compliance with OSHA Standard
	63 FR 1152, January 8, 1998. Respirator type: Air-purifying
	respirator with an appropriate, government approved (where
	applicable), air-purifying filter, cartridge or canister. Contact
	health and safety professional or manufacturer for specific
	information. Self-Contained Breathing Apparatus may be
	required for use in confined or enclosed spaces.
PROTECTIVE CLOTHING:	. Eye/face protection: Wear chemical goggles; face shield (if
	splashing is possible). Skin protection: Chemical resistant,
	impermeable gloves. Gloves should be tested to determine
	suitability for prolonged contact. Use of impervious apron or
	chemical suit and chemical resistant boots are recommended.
ADDITONAL MEASURES:	Handle in accordance with good industrial hygiene and safety
	practice. Wash thoroughly with soap and water after handling
	and before eating, drinking, or using tobacco. Safety shower
	and eye wash should be available close to work areas.
